FOREWORD

In the 1970's the rural United States started to emerge from widespread deficiency of housing for families of low and moderate income.

Housing deterioration accumulated for several decades in rural towns and countryside, due in large degree to a scarcity of home mortgage credit.

Programs for Government guarantee of home loans made by private lenders were productive in urban areas, but inoperable in thousands of smaller communities where there were few, if any, local lending institutions to supply this type of home loan service. As a consequence, census surveys in the 1960's found two-thirds of the Nation's inadequate housing to be located in nonmetropolitan areas that contained only about one-third of the American population. This meant that the ratio of inadequate housing to numbers of families was twice as great in rural areas as in the cities.

Significant action to rectify the credit deficit has come through expansion of rural housing programs of the Farmers Home Administration (FmHA). This is the multipurpose credit agency of the U. S. Department of Agriculture that serves both farm and nonfarm rural people through local county offices.

A series of Congressional actions since 1965, when FmHA home loans were limited to the countryside and towns of not more than 2,500, has enlarged the jurisdiction to rural area communities of up to 20,000 population. Housing credit from FmHA now enables families of low and moderate income to move into good quality housing at a rate of about 150,000 units a year -- some 15 times the rate of 1965. Dollar volume of credit through the rural housing programs has soared since 1965 from about \$130 million to more than \$3 billion a year.

FmHA administers rural housing credit authorities delegated to the Secretary of Agriculture by the Housing Act of 1949, as amended. Lending is funded from the Rural Housing Insurance Fund (RHIF), a revolving fund that draws resources from money collected on previous loans and from sale of Federal securities to the public. Loans made directly from the RHIF to homeowner families or builders of multi-family housing are categorized as "insured" loans, in that FmHA obligates money that the public has supplied through investment in Government-guaranteed securities.

The data provided in this publication are an essential part of the history of the development of a meaningful housing credit service for rural areas. Tables provided on the following pages reflect a rising opportunity for people in rural areas to share equally with urban dwellers in the long proclaimed goal of "a decent home and suitable living environment for every citizen."

In recent years, FmHA has introduced modern electronic methods of recording and reproducing information on program volume and characteristics of borrowers. However, the records of the rural housing program's earlier phase -- those of the 1950's and 1960's -- were compiled through many hours of manual effort by a small and dedicated staff whose work is eminently deserving of recognition. The FmHA Management Information Staff acknowledges this contribution made by retired staff statisticians Harriet Kelly and Arlene Wilson.
